LANGUAGES

- English: B2
- Arabic: Native
- Berber: Native

HOBBIES

Swimming, Horseback Riding, Podcast Listening.

An international Applied Computer Science student with a strong interest in artificial intelligence and its practical applications. I'm especially interested in Agentic AI, where systems can plan, use tools, and automate tasks to solve real problems. I enjoy simplifying complex ideas into practical solutions. Outside of tech, I like traveling, exploring new cultures, and connecting with people from different backgrounds, which helps me work well in diverse teams.
